

Our Methodology

Our methodology is what sets us apart from other training providers. Using a data-driven approach, we build employee skill profiles to better align training and measure effectiveness against your organization's goals.

When it comes to training and workforce development, we believe it's important to continuously assess and adjust to keep pace with the evolution of your workforce needs. Our six-step methodology is rooted in data to help inform the next step and ensure it ties back to your organization's goals.

A data-driven approach to training.

Goal Setting

Align training to business goals through in-depth consultation to understand workforce needs and success metrics like increasing certification pass rates, improving onboarding, or updating job roles.

Assess

Use diagnostic assessments to baseline employees' current skills and competencies. Assessments are built into our comprehensive courses or use our NICE Workforce Diagnostic.

Insights

Discover employee skill strengths and weaknesses by role or topic. Following the diagnostic, we create skill profiles and analyze results to uncover performance trends to guide training.

Training

Deploy training roadmap options with either off-the-shelf courses or a custom configured program and work with you to ensure it aligns with your schedule and organizational goals.

Reassess

Reassess employees to measure improvement and program effectiveness. Final examinations are included with each comprehensive course to evaluate improvement.

Insights

Receive analysis and recommendations for continuous improvement through a detailed insights report and/or expert consultation, receive guidance on long-term strategy.
